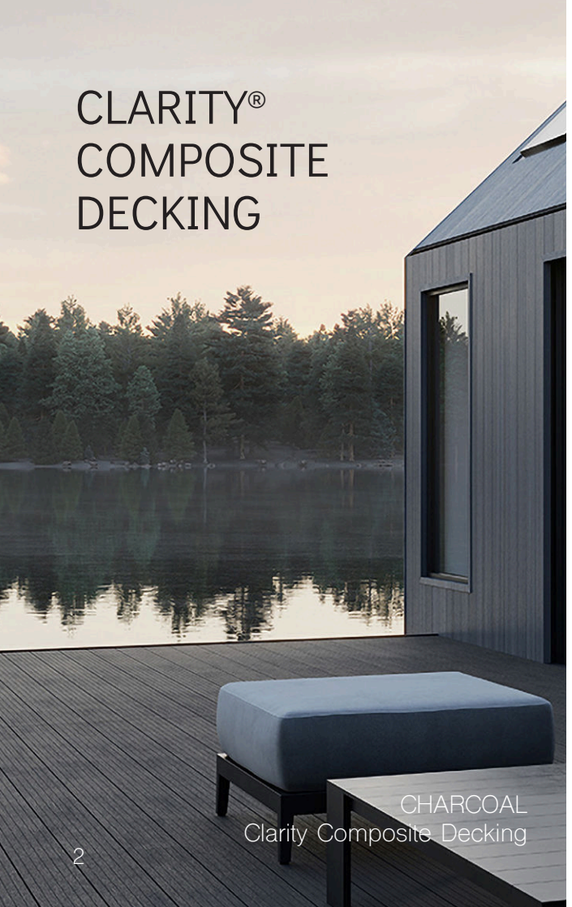
Graphite Clarity composite decking

CLARITY® COMPOSITE DECKING



CHARCOAL
Clarity Composite Decking

Ecoscape Clarity® composite decking is a long lasting, low maintenance alternative to timber decking. Made up of recycled high density polyethylene plastic and reclaimed wood fibres. This unique makeup draws on the durability of synthetic products whilst maintaining the natural look and malleability of timber without any of its notable drawbacks.

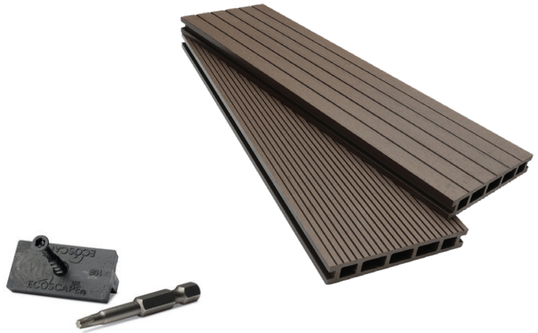
This attractive and sustainable composite decking board is available in 3 beautiful colours and has a dual surface finish meaning the board can be laid either side up to achieve a different aesthetic.

Our Clarity® boards have also been independently tested to BS 7976-2:2002 and are slip resistant in both wet and dry conditions, making family safety one of its most attractive selling points.

20 YEAR WARRANTY

FSC www.fsc.org

Clarity® boards are dual sided with wide grooves on one side and narrower grooves on the other.



Our T-Clip fixing system is engineered for quick and easy installation whilst maintaining a high quality finish. The clips space decking boards evenly allowing for expansion and contraction with temperature fluctuation.

PLEASE NOTE: Lighter Clarity boards will show greater colour settling due to smaller quantities of dye and greater UV exposure to the natural wood fibres. After 3 months of UV exposure colour remains consistent.
