INNOVATIVE & SUSTAINABLE DESIGN

As manufacturers of wood plastic composite products, our collection includes attractive low maintenance decking, cladding, fencing and balustrade systems.

We aim to be at the forefront of the garden design industry with excellent quality, stylish and efficient systems that not only look beautiful but perform to the highest standard.

We use recycled plastic in all of our composite products. In 2022 alone we recycled 5,717 tons of waste plastic in our materials.

CLARITY® COMPOSITE DECKING

ASH
Clarity Composite
Decking

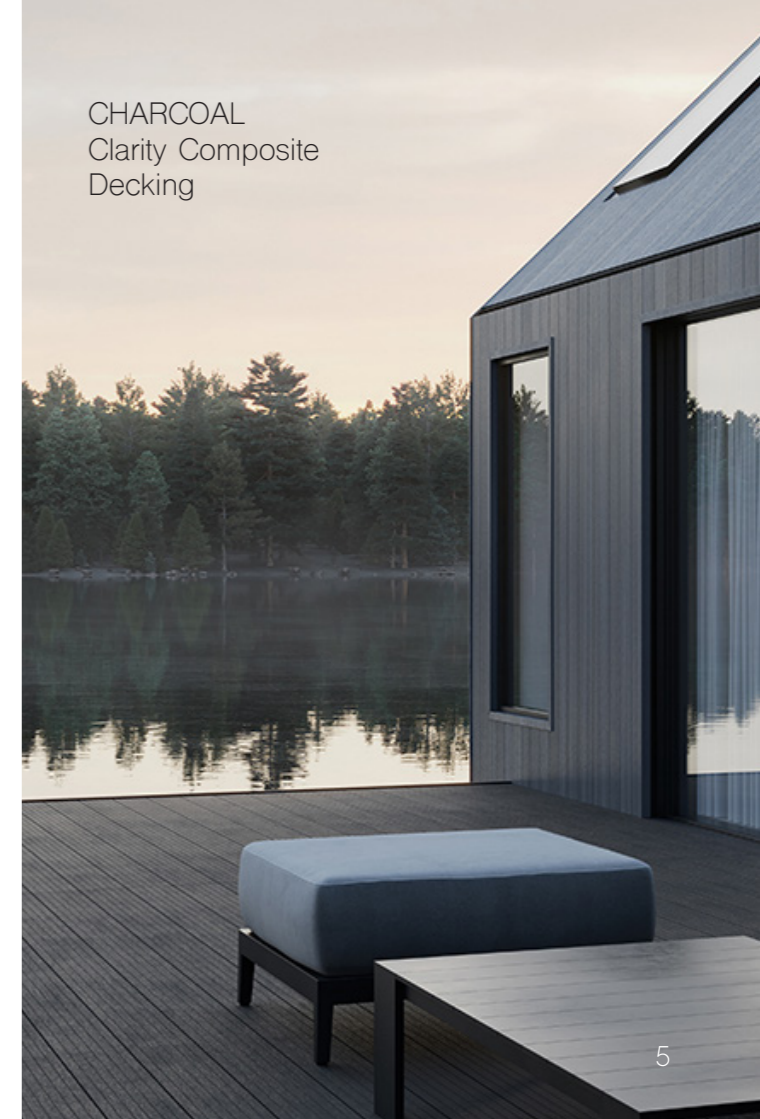

Ecoscape Clarity® composite decking is a long lasting, low maintenance alternative to timber decking. Made up of recycled high density polyethylene plastic and reclaimed wood fibres. This unique makeup draws on the durability of synthetic products whilst maintaining the natural look and malleability of timber without any of its notable drawbacks.

This attractive and sustainable composite decking board is available in 5 beautiful colours and has a dual surface finish meaning the board can be laid either side up to achieve a different aesthetic.

Our Clarity® boards have also been independently tested to BS 7976-2:2002 and are classified as low slip potential in both wet and dry conditions making family safety one of its most attractive selling points.

CHARCOAL
Clarity Composite
Decking

Clarity® boards are dual sided with wide grooves on one side and narrower grooves on the other.

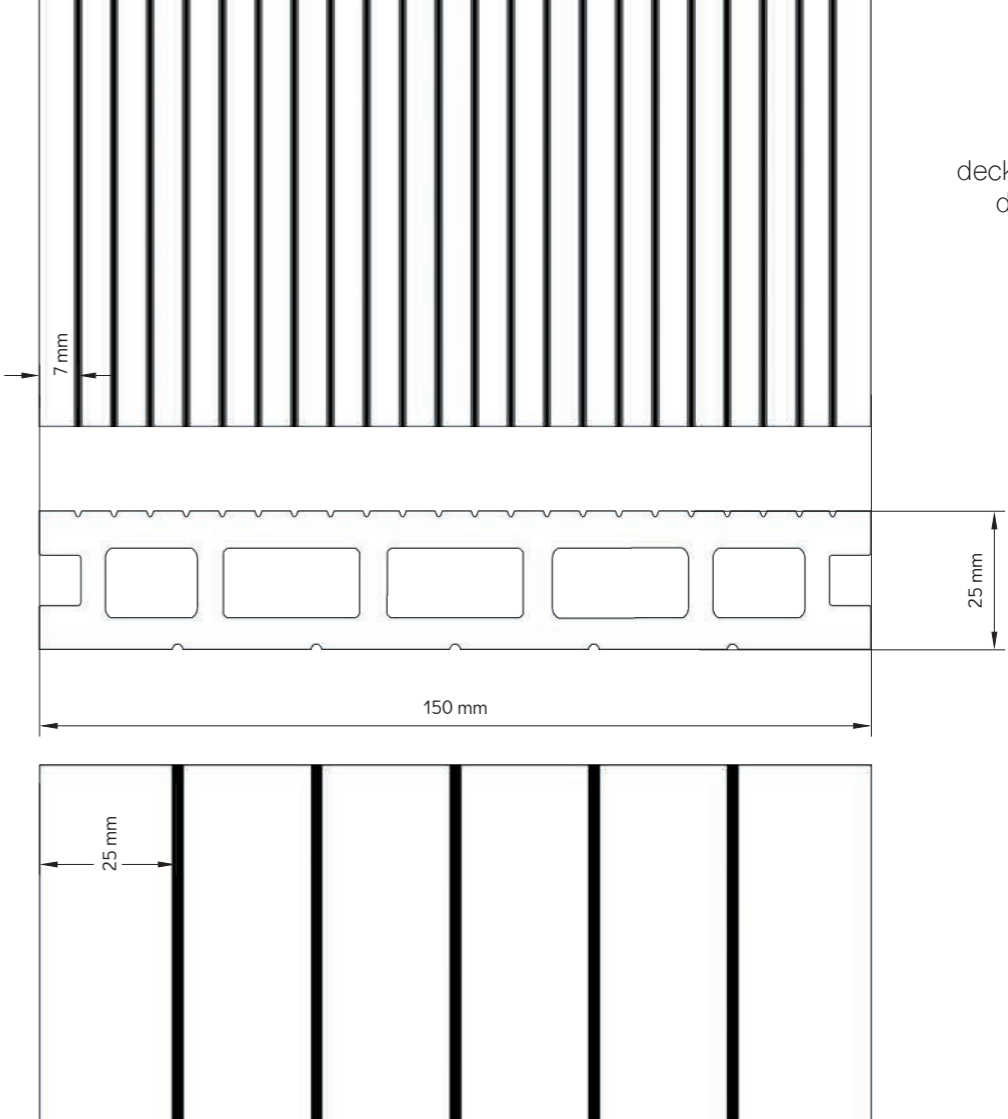

Our T-Clip fixing system is engineered for quick and easy installation whilst maintaining a high quality finish. The clips space decking boards evenly allowing for expansion and contraction with temperature fluctuation.

Narrow groove side

Clarity decking board dimensions

Wide groove side

Anti-slip surface

Low maintenance – no need to paint, stain or seal

Does not rot, warp or splinter

Natural looking without many of the drawbacks of timber

Easy installation system with invisible fixings

Extensive 20 year warranty

FLINT
Forma
Composite
Decking

FLINT
Forma
Composite
Decking

Forma® composite decking is our premium composite with a durable polymer outer shell encapsulating the board. This capping forms an impermeable layer that protects from scratching, staining and fading making it the ultimate carefree, low maintenance flooring.

Available in six beautiful colours this stylish and sustainable decking board can instantly elevate any project into a luxury space.

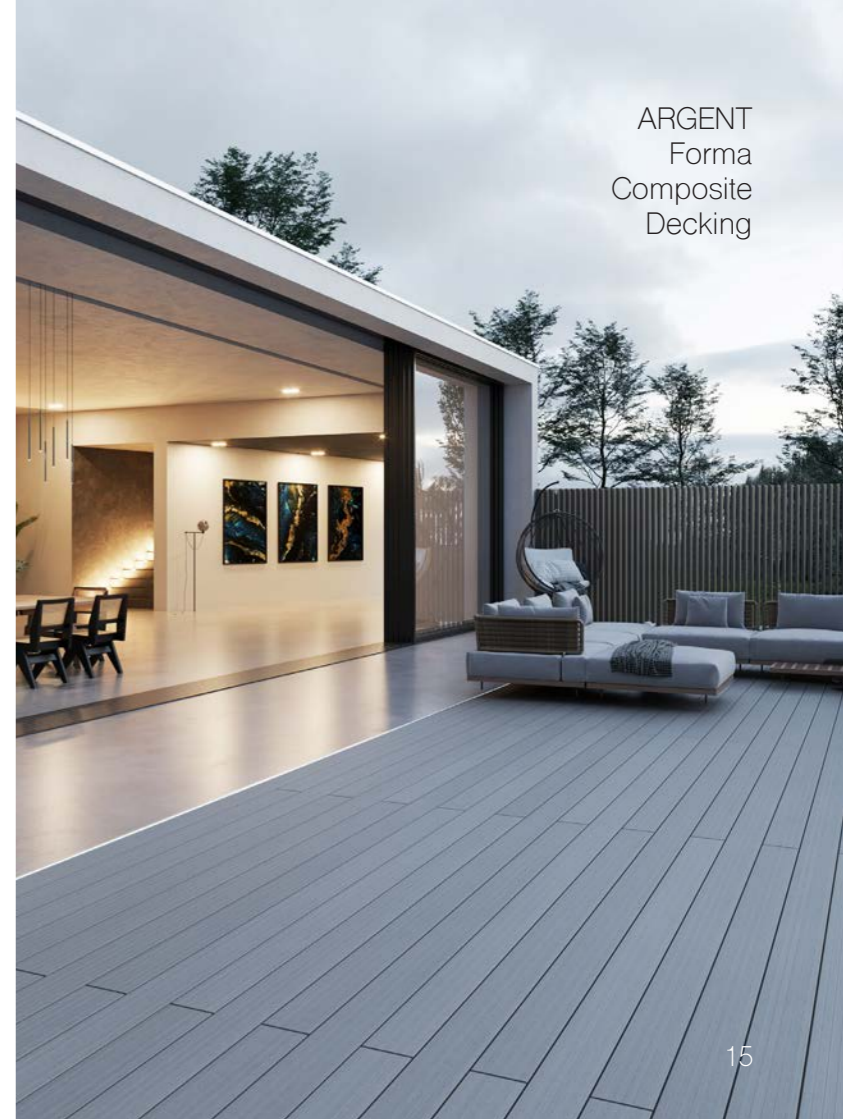

The T-Clip fixing system allows boards to move freely with expansion and contraction preventing any buckling, twisting or warping. This clip is also conveniently hidden in the grooves of the decking board so there are no visible fixings through the top of the decking.

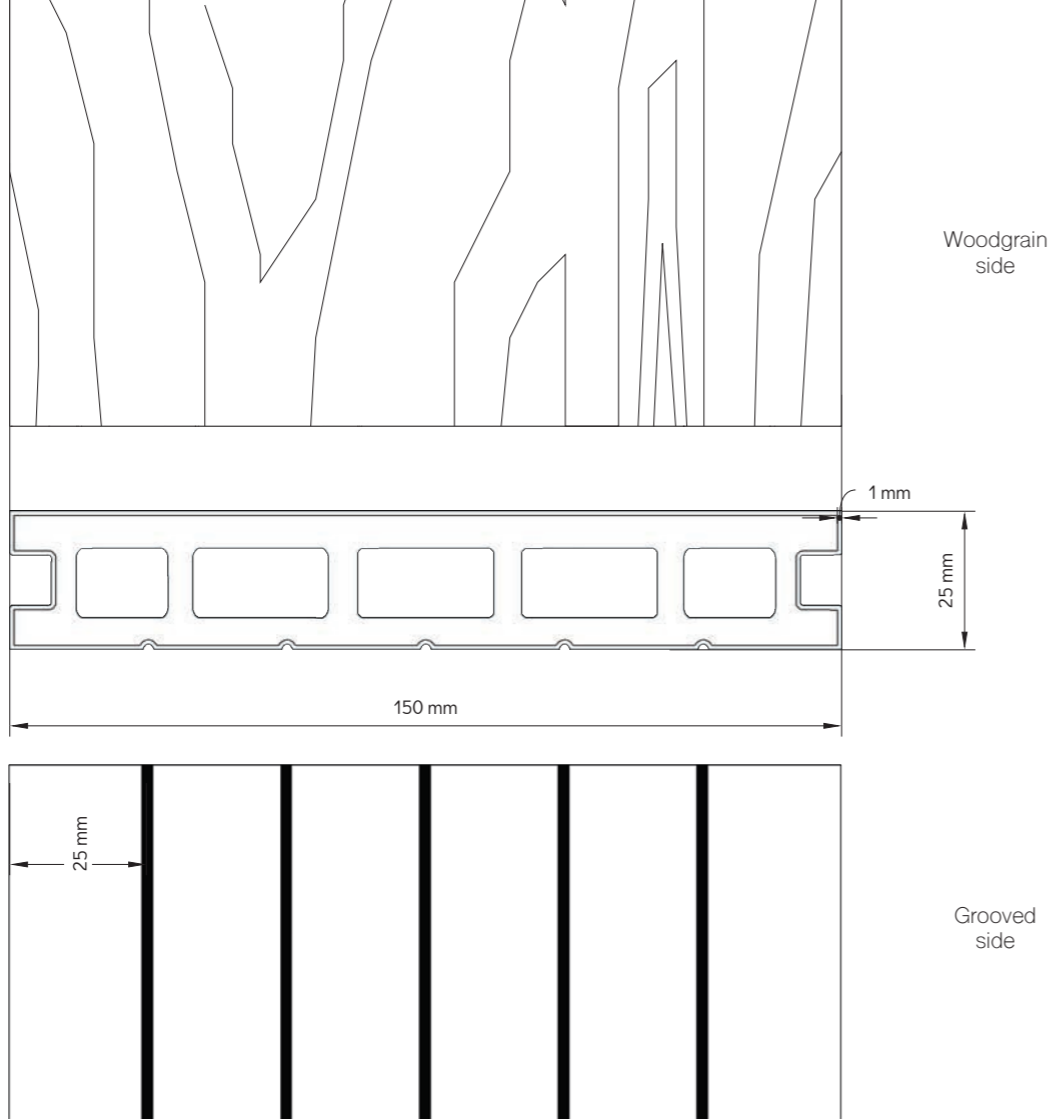

Our Locking Clip is similar to the T-Clip but with serrated teeth which locks the board in place. This ensures even expansion or contraction during hot or cold weather but prevents the board from sliding.

ARGENT

GRANDE COMPOSITE DECKING

CHATEAU
Grande Composite
Decking

Similar to our Forma range, our Grande decking boards are made up of 95% recycled material and uses advanced co-extrusion technology which generates an externally durable outer layer.

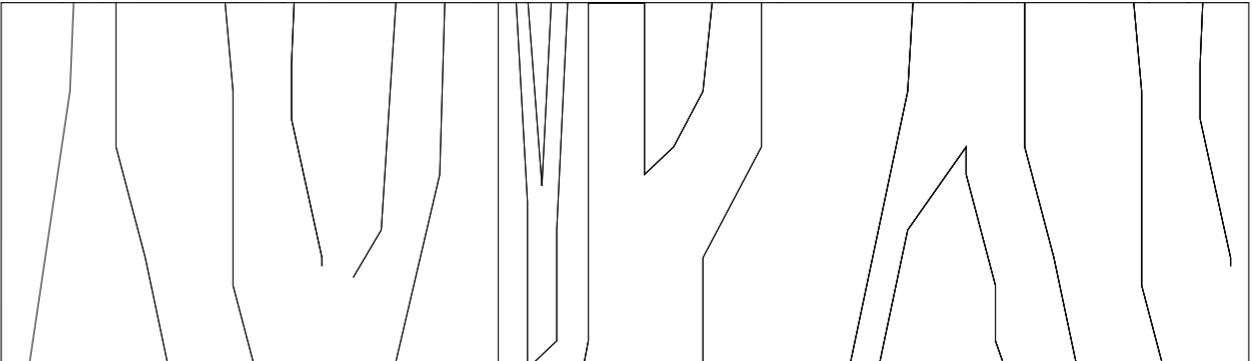

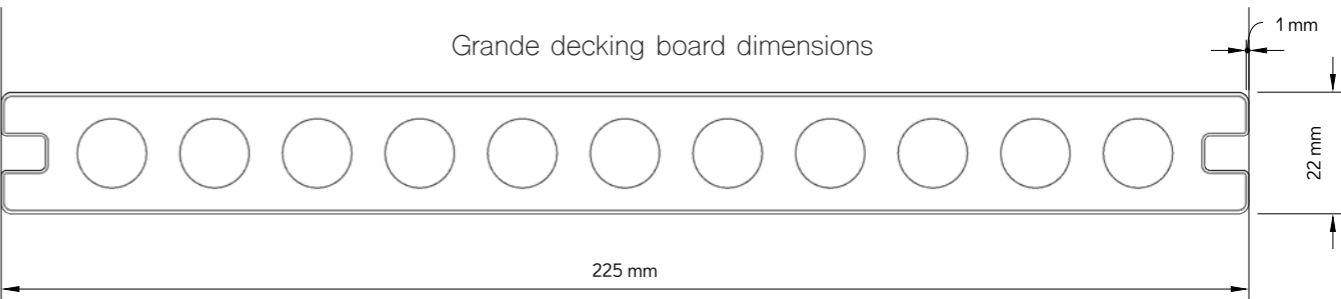

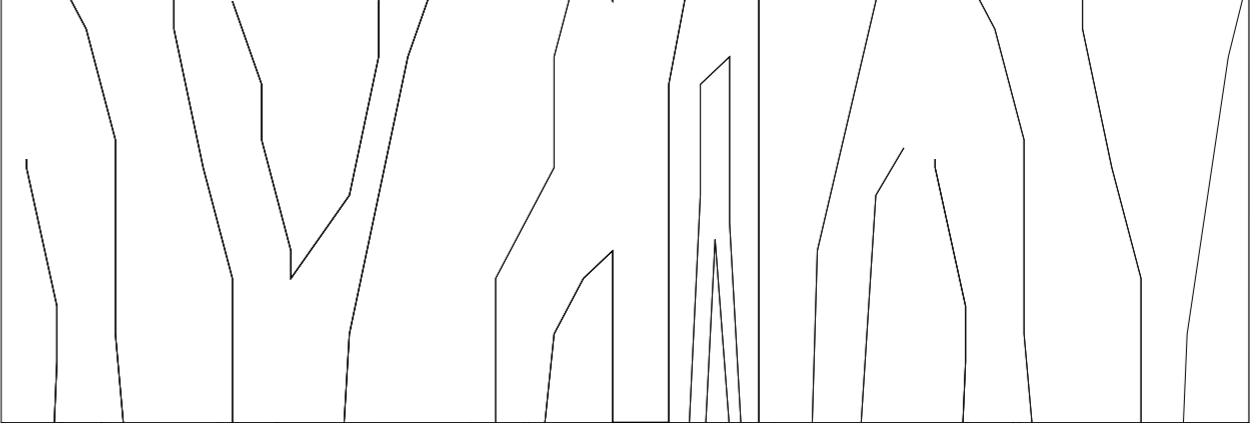

As the name suggests, the Grande board is 50% wider than a standard decking board at 225mm – for an elegant and contemporary look – which has the added benefit of being quicker to fit.

DOVETAIL
Grande Composite
Decking

Our capped technology and advanced brushing techniques create a composite decking board with exceptional anti-slip values, is UV stable and comes with a 25 year guarantee.

Grande is dual sided with the warm light grey Dovetail colour on one side and beige coloured Chateau on the other. Each side has a natural looking woodgrain finish.

CLARITY® COMPOSITE FENCING & GATES

Ecoscape's range of composite fencing and gates are an innovative modular WPC profile which stack to create any desired height. This creates a bespoke long lasting, low maintenance alternative to timber fence panels.

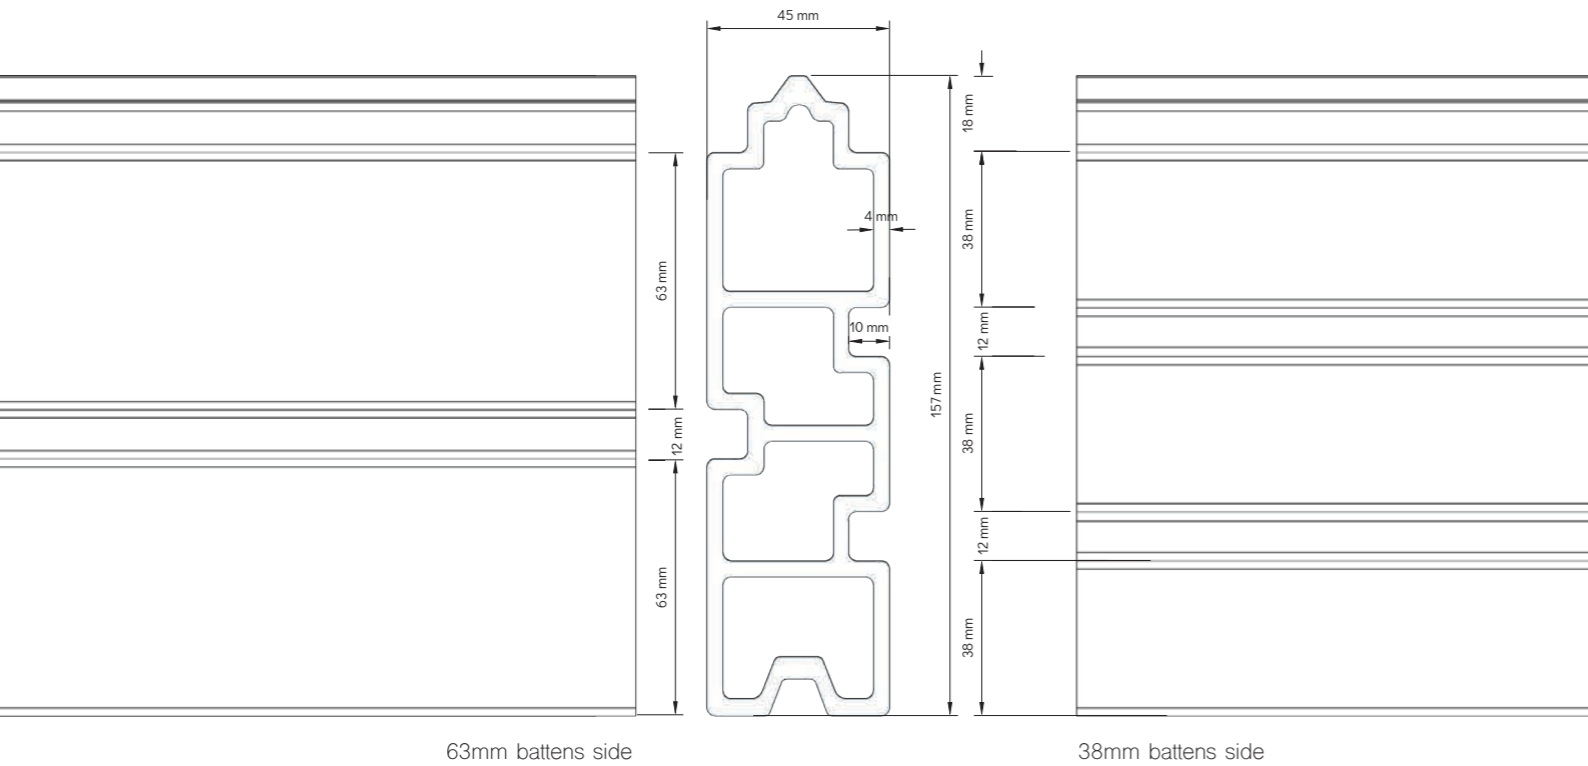

Fence boards can either be retrofitted between existing fence posts or can be utilised in the fully composite post system; the perfect way to transform any garden into in to a luxury space.

This versatile system offers flexibility and style but also maintains the same environmentally friendly ethos as our other composite ranges and is made up of the same high quality recycled HDPE plastic and reclaimed wood fibres.

PEDESTAL SYSTEMS

QUEEN
Q4 Decking Pedestals

All of our decking and paving pedestals are made in Italy from 100% recycled polypropylene with anti-noise rubber coated heads, using advanced electric injection presses which release no emissions or waste oil.

The four ranges of pedestal include King, Queen, Junior & Lord and are beautifully boxed in our 100% FSC® packaging. The range comes with a 15 year limited warranty and 40+ year design life. We have 10 European registered patents, with our technology being unique to the market.

Across the four ranges you have the choice of self-levelling base supports, self-levelling heads and fixed supports, complete with a range of tools and ancillaries to cater for most laying issues and needs.

For technical information visit www.ecoscape.co.uk

“The market’s only recycled polypropylene support with a load capacity exceeding 1800kg”

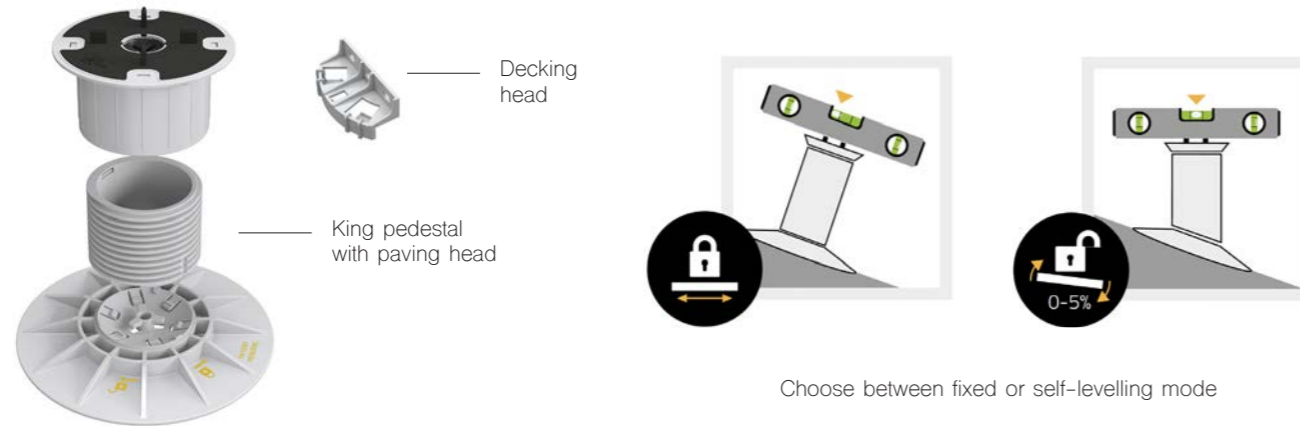

KING
K5 Paving Pedestals

KING PEDESTALS

This revolutionary patented pedestal is adjustable in height and allows the installer to choose between fixed or self-levelling base, just by twisting the converter located under the tower. The self-levelling base allows for maximum accuracy of adjustment and this additional function can correct level differences up to 5% of the surface.

All of our pedestals are made up of 100% recycled high-quality polypropylene to create a sustainable and durable reinforced base and impact resistant screw. The King pedestal is the market's only recycled polypropylene support with a load capacity exceeding 1800kg.

K9 (K5 + P1 + P1)	280mm-436mm
K10 (K5 + P1 + P1 + P1)	340mm-545mm

Can be stacked all the way to K15

P1 King Extension, 113mm height, allowing King pedestals to reach heights of 1500mm+.

QUEEN PEDESTALS

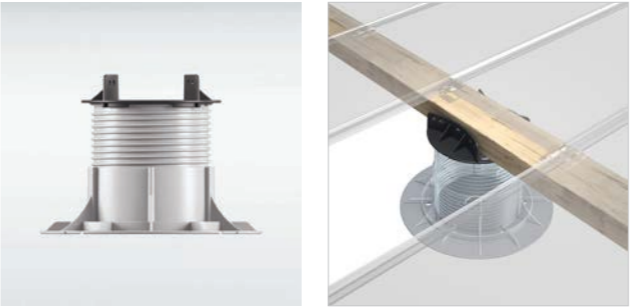

Queen is a reliable and durable raised floor support that is adjustable in height, with a fixed head. Ideal for multi-level renovations and projects that require operating at low heights. The Queen's minimum elevation height is just 21mm, through to 1000mm+.

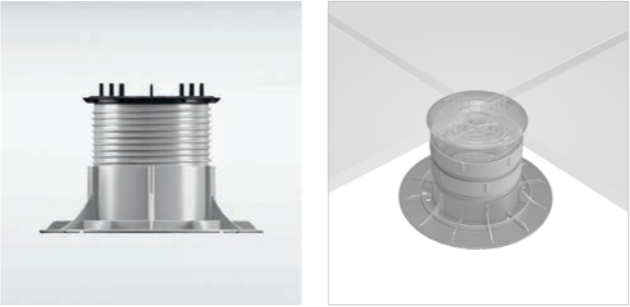

With the application of a simple component between the screw and head, the Queen Plus attachment offers the option of self-levelling at the head to correct slopes of up to 5%. This transitions the Queen pedestal from fixed to a simple and practical self-levelling support.

FORTE TIMBER FREE SUBSTRUCTURES

Using only the highest grade 100% recycled plastics we produce extremely strong and durable plastic joists/battens as an alternative to using a timber substructure. With profiles suitable for both decking and cladding these solutions are especially beneficial in the damp British climate where timber can be compromised in a matter of a few years.

We also offer a recycled aluminium support system. Extremely light weight and durable – aluminium does not warp, shrink, swell like timber and remains perfectly straight throughout its 80+ year lifespan. The recycling process only takes up 5% of the energy used during its manufacturing and the quality of recycle aluminium is the same as that of new.

ENVIRONMENTAL SUSTAINABILITY

All of our composite materials are made using a mixture of reclaimed timber fibres, recycled HDPE and environmentally sustainable bonding agents and dyes to create high quality products that replicate the characteristics of timber without any of the drawbacks; like rotting, warping, drastic colour fading, ongoing maintenance etc.

The use of recycled HDPE plastics help aid in the battle to reduce landfill and ocean plastics but also reducing our carbon footprint.

For more information about our sustainability visit
ecoscape.co.uk
