- Moulded from 20+ real oak boards
- Extra-wide 200mm robust board
- 29mm thickness with 600mm joist spans
- Patented elastomer PU capping
- Lost-head screws for a clean finish
- Exceptional durability and longevity

Bronzed Oak

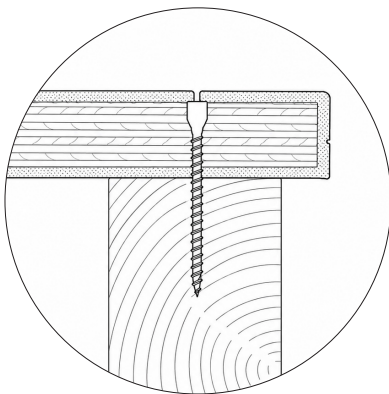

LOOKS LIKE OAK - PERFORMS LIKE COMPOSITE

Timbex introduces a new approach to composite decking, combining the character and authenticity of natural timber with the performance and longevity demanded by modern outdoor living.

Developed in response to the growing influence of interior design on outdoor spaces, this innovative range is designed for those seeking to combine considered aesthetics with lasting performance.

Unique Non-Repeating Grain

Manufactured from moulds taken from more than 20 carefully selected oak boards, every profile captures the texture, grain and subtle character that make real wood so desirable. Unlike conventional composite decking, each board features a non-repeating grain pattern, creating a rich and natural appearance with exceptional depth and variation. The result is a surface that looks and feels remarkably close to genuine timber, bringing warmth, texture and sophistication to any outdoor space.

Timbex features an elastomer PU capping and lost-head screws, creating a clean, virtually fixing-free finish.

Carefully Engineered Materials

Beneath its authentic appearance is a highly engineered construction. A water-resistant FSC-certified solid-core profile, wrapped in a patented elastomer polyurethane surface layer, delivers durability while preserving the tactile qualities of natural wood.

Virtually Invisible Fixings

The unique textured capping subtly conceals surface fixings, creating a clean, uninterrupted finish that appears virtually free of visible fixings once installed.

Antique Oak

Extended Joist Spans

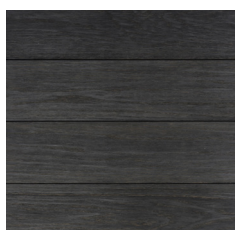

Delivering a premium finish, Timbex solid boards make installation faster and easier than conventional composite decking. Wide boards span up to 600mm centres, reducing the supporting framework required, while the simple fixing system saves time. The result is the look of hardwood with the durability and low-maintenance of composite.

Silvered Oak

FIVE OAK-INSPIRED COLOURS

The Timbex palette is designed to complement both contemporary architecture and traditional outdoor spaces. From dramatic Black Oak to sun-washed Silvered Oak, each hue is carefully selected to enhance the natural grain and bring the board's rich, authentic texture to life.

BOARD SPECIFICATION

Width: 200mm

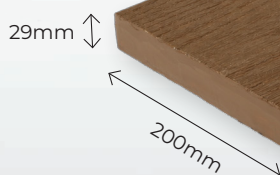

Length: 3660mm

Thickness: 29mm

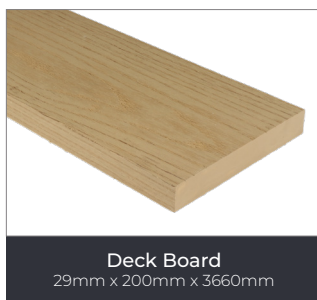

Joist Centres: 600mm

Capping: 3mm UV resistant, scratch resistant and stain resistant PU elastomer.

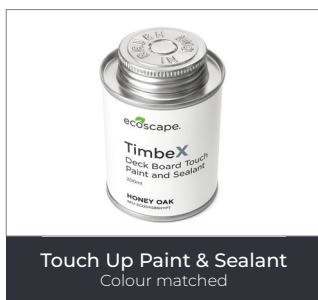

Core: Cross-laminated Eucalyptus hardwood veneer, bonded with exterior-grade, water-resistant resins.

TIMBEX COMPONENTS

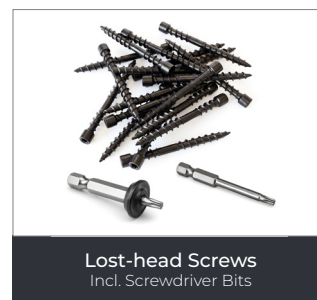

Deck Board
29mm x 200mm x 3660mm

Touch Up Paint & Sealant
Colour matched

Fixing Guide & Spacer
2mm / 5mm

Lost-head Screws
Incl. Screwdriver Bits
